

The new KIRKSAETER PRISMA cabinet models are ready for the digital 21. Century, are you?

If you decide to buy new speakers now, be sure that you purchase speakers of the latest construction being able to handle the enormous dimension of sound coming out of the new digital media now available. New formats or languages make Computers, TV, CD, digital camcorders and cameras able to talk the same language. A black box in your home will feed the sound of all those sources to your amplifier that controls your Stereo- or Home Theater sound system.

This new sound has many times more dynamic and details than earlier days. New recording devices able you to download your latest hit from your present program and make your own CD's like you make your music cassettes now. To be able to enjoy this new dimension of sound you need very special speakers like the new KIRKSAETER PRISMA models. Listen to KIRKSAETER PRISMA at your dealer and you will understand why.

When you select KIRKSAETER PRISMA you also invest in a future modular system where all models are designed to work perfectly together in all possible combinations whether you have a two channel stereo system or seven channel Home Theater System.

Why is PRISMA so outstanding?

Since the end of the fifties KIRKSAETER stands for outstanding quality, reliability and progressive constructions, like the world's first production amplifier with complementary transistors and modular technology. Patents and Awards prove this. Squaring the circle is the way he comes up with unconventional and creative design. By constantly optimizing the magic triangle, the result is higher Technical innovation, Product quality and better value for money. This is the reason why Per Kirksaeter as one of the last Pioneers in High End Audio, still maintaining his position in today's global competition.

Loudspeaker Column PRISMA 210

The high tall form gives sufficient volume for the use of two 19 cm bass drivers that fill your room with a strong, dry and analytic clean bass. The efficiency is very high and PRISMA 210 can be used with smaller amplifiers. The beautiful cabinet is available in several finishes. The MDF-front is rounded at the edges to allow a smooth beaming of the sound. The new 15 cm midrange is of such a good quality that one does not expect to find this in PRISMA 210. It is build into an acoustical sealed box with defined volume and damping material. The cone and the surround are made of one piece material to reduce peaks and distortion. The new silk Dome tweeter provides 160 degrees dispersion that lets you place the speaker where you like in the room. Together with the new kind of crossover it is an especially strong, brilliant and dynamic sound experience. In Norway the previous model PRISMA 200 was elected as best buy in its class.

The development of the PRISMA Speaker Technology has been an examination of a number of experiences and directions of the audio technology over the last 45 years. When the development progresses stop, Per Kirksaeter investigates by means of new angles of view to become a breakthrough in technology by other means.

By PRISMA you need down to half the output power in Watts that are usually needed.

Because PRISMA has a very high efficiency PRISMA gives a higher sound level per Watt than normal speakers do. This is called high efficiency speakers. As most of the amplifiers sold are of lower output power, we have made as our goal to make the best loudspeaker possible inside the Prisma price category to be used with amplifiers of lower output power. PRISMA 210 is one of the few speakers that can be connected to a 10 Watt tube amplifier. Therefore you can improve your system just by changing your present models to the PRISMA.

Gold plated biwiring terminals secure no oxidation in many years, so no music impulses get lost. The KIRKSAETER silk dome tweeter has a radiation of 160 degrees and gives you the full range of the high frequencies regardless if the speaker is placed in the ceilings or at a wall or where you decide to listen in your room. Therefore you can place the Prisma speakers, wherever you like in your room and always enjoy full High End fidelity and dynamics.

To the right in the picture you see the new silk Dome assembled in a concave front MDF-plate that gives an extra wide dispersion so everybody enjoy the airy highs. The new midrange is assembled in its own closed box of fixed volume where the cone and suspension is the same part to get rid of the edge distortion normally occurred.

TECNICAL DATA

Type of speaker:	Floorstanding column
Music peak power:	300 Watts
Music impulse power:	210 Watts
Continuous power rating, DIN:	160 Watts
Frequency response:	26 – 22.000 Hz
Recommended amplifier:	20 – 100 Watts
Crossover Frequencies:	3-ways 500/3000 Hz, double
Impedance:	4-8 Ohms
Woofer, long excursion:	2x19 cm coated fiber cone
Midrange:	15 cm one piece coated cone
Tweeter:	25 mm soft silk Dome
Weight net:	20 kg, 45 lb
Width x Depth x Height in cm:	23,5 x 26,5 x 105 cm
Width x Depth x Height in inch:	9,25 x 10,5 x 41, 5"
Finish:	Black/Mahogany/Beech
